REAL LADY

About Real

At the Heart of Irontech, Beats a Passion for Your Pleasure.

Real Lady is a luxury BRAND brought to you by the legendary Irontech Doll. Our dedication to craftsmanship, customization, and customer satisfaction sets us apart, offering an elevated and personalized experience to those seeking companionship and intimacy through love dolls. No other manufacturer captures full body skin texture and appearance like we do. It's not just a brand - It's a revolution in redefining pleasure and intimacy.

'Real Lady' by Irontech Doll.
Elevating Intimacy, Redefining Companionship.

Hello, thank you for choosing the Real Lady doll. PLEASE READ THIS MANUAL BEFORE YOU UNPACK YOUR DOLL.

Lifelike Human Proportion: Our dolls feature a 1:1 replica of a woman's body, ensuring a true-to-life experience.

Uniform skin texture: The Real Lady product boasts a flawless and uniform skin texture that spans across all body parts, encompassing hands, feet, knees, joints, and collarbones. This results in an incredibly authentic encounter, faithfully capturing intricate elements such as subtle wrinkles and pores found on genuine human skin.

Enhanced vaginal experience: One of the most important features of a love doll lies in its precise and anatomically accurate design of the intimate area. In our Real Lady series, we have carefully crafted the positioning of the doll's vagina to mimic that of an actual human to ensure a realistic experience.

We hope that Real Lady Doll can become your ideal companion, providing a truly realistic and fulfilling experience.

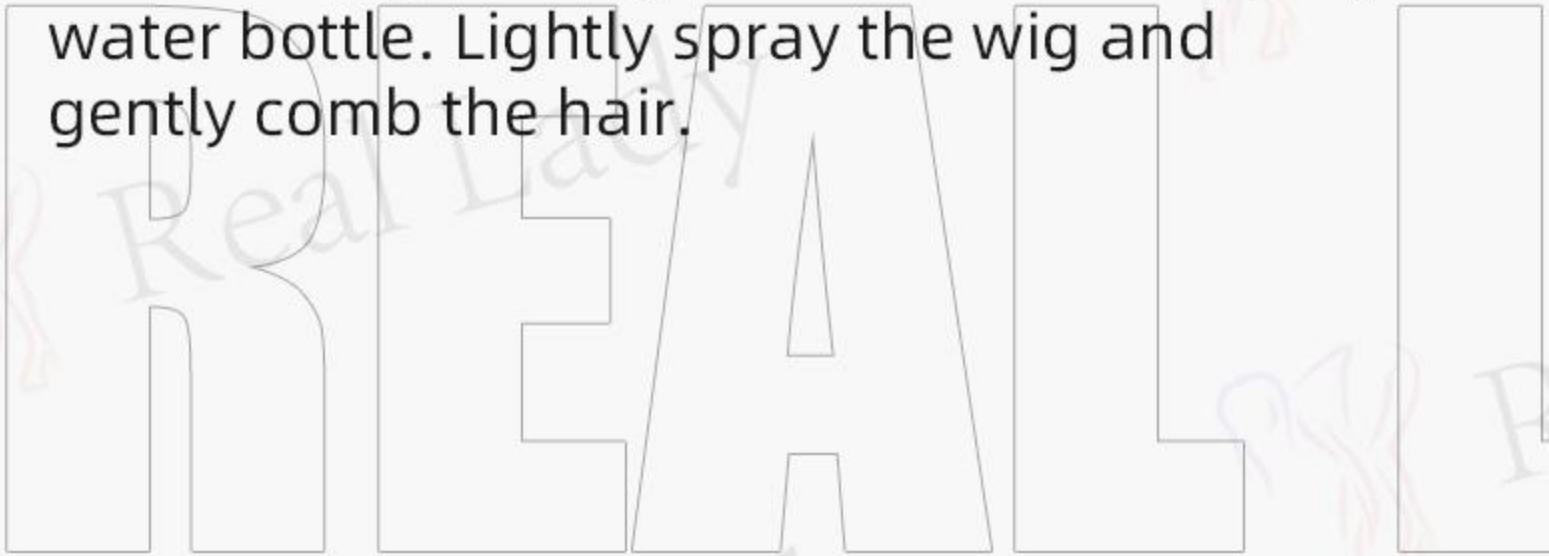

Accessories

Comb

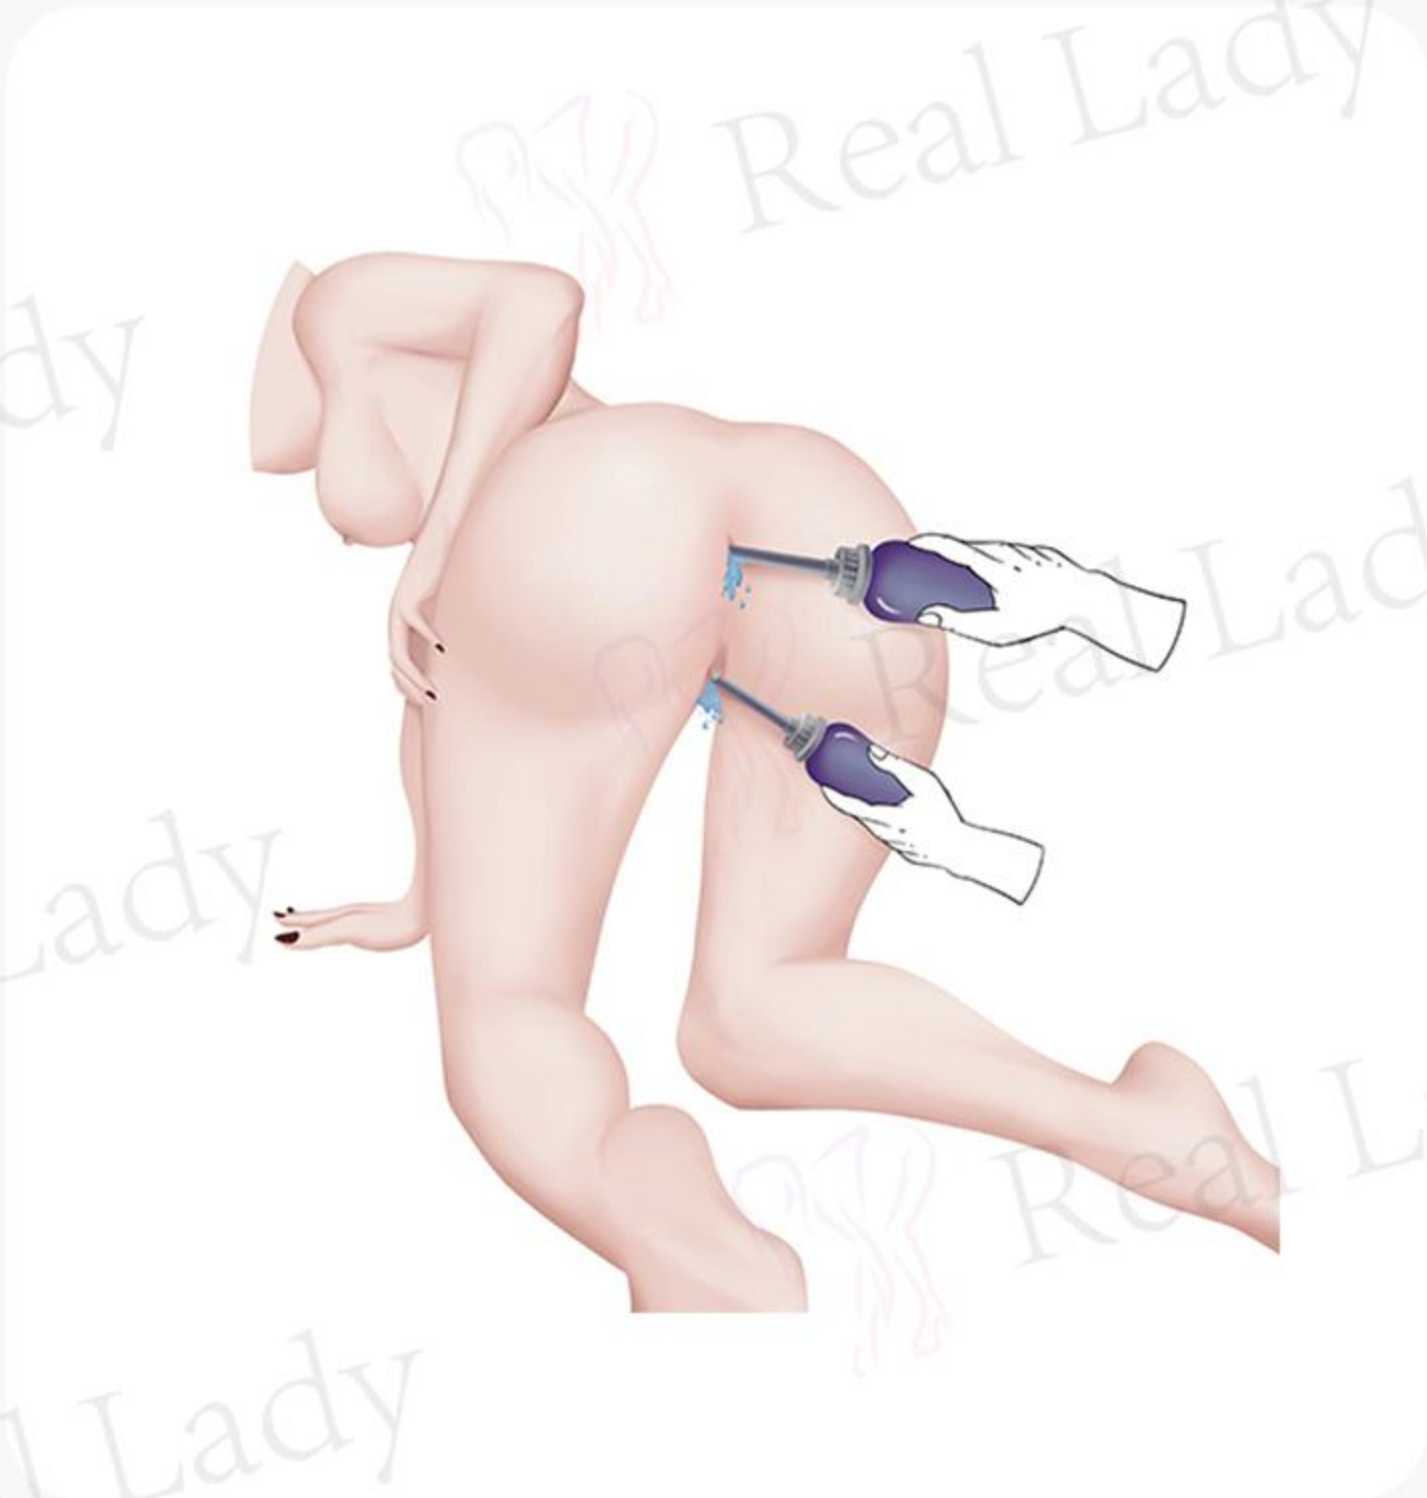

For combing the wig. It's best to use a spray water bottle. Lightly spray the wig and gently comb the hair.

- 01.** Fill the bottle provided with clean, warm water or mild soapy water.
- 02.** Gently insert the nozzle of the irrigator into the tunnel.
- 03.** Squeeze the bottle gently to release the water and flush out the tunnel. This works best at the edge of the bed, with a bucket or bowl underneath.
- 04.** If necessary, repeat the process until the inside is thoroughly cleansed and no longer slippery.
- 05.** For the final rinse, use clean water.
- 06.** Now dry the tunnel with a soft sponge that you clamp with swab forceps.
- 07.** Then drip some hydrogen peroxide 3% onto the sponge and insert it into the tunnel and out again. The tunnel is now disinfected and sterile.
- 08.** Finally, use the drying stick for an hour or two (Explained in the next page). This draws out any remaining odor, and your love doll is fresh and appetizingly clean again.

Vaginal Cleansing

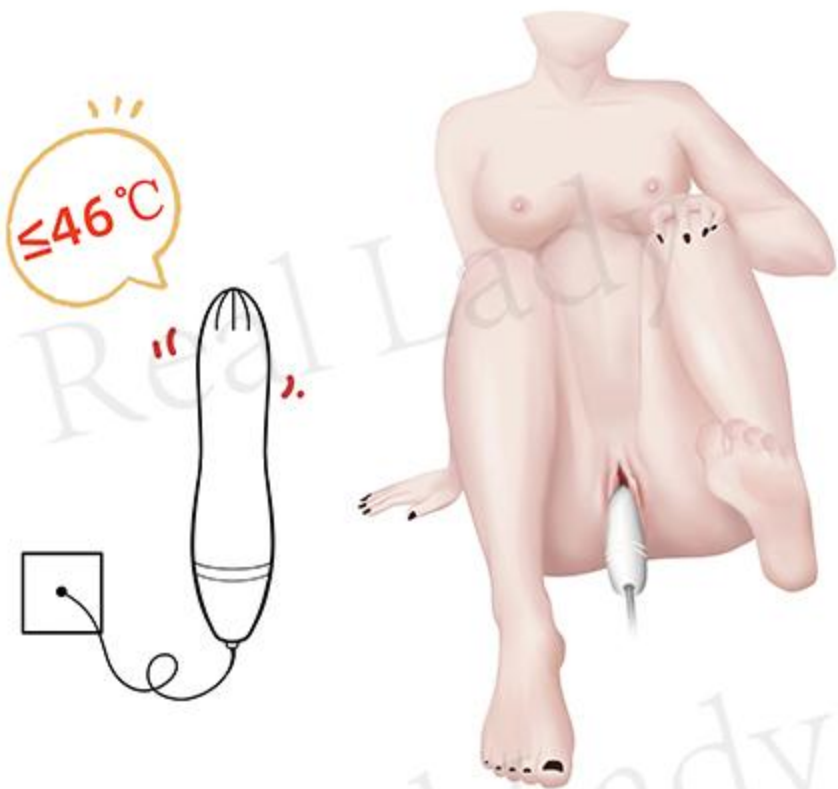

Intended for cleaning penetrable areas (mouth, vagina, and anus). Follow these steps for effective cleaning:

Please handle the cleaning of the interior of the silicone product with care, avoiding excessive pressure or poking to maintain its integrity and longevity.

Drying Stick

We offer two drying sticks for absorbing residual moisture in the vaginal area. Please insert it into the tunnel after thorough cleaning until all water is completely absorbed.

USB heating rod:

Used to warm up the vagina and provide a more natural feeling. Only takes 15-20 minutes to warm the tunnel. Avoid heating the tunnel for more than 30 minutes. It's best to never leave your doll unattended while utilizing the heating rod. Safety first.

Automatic Temperature Control under 46°C	Material: ABS,PU
USB Adapter	Size: 15cmx1.7cm

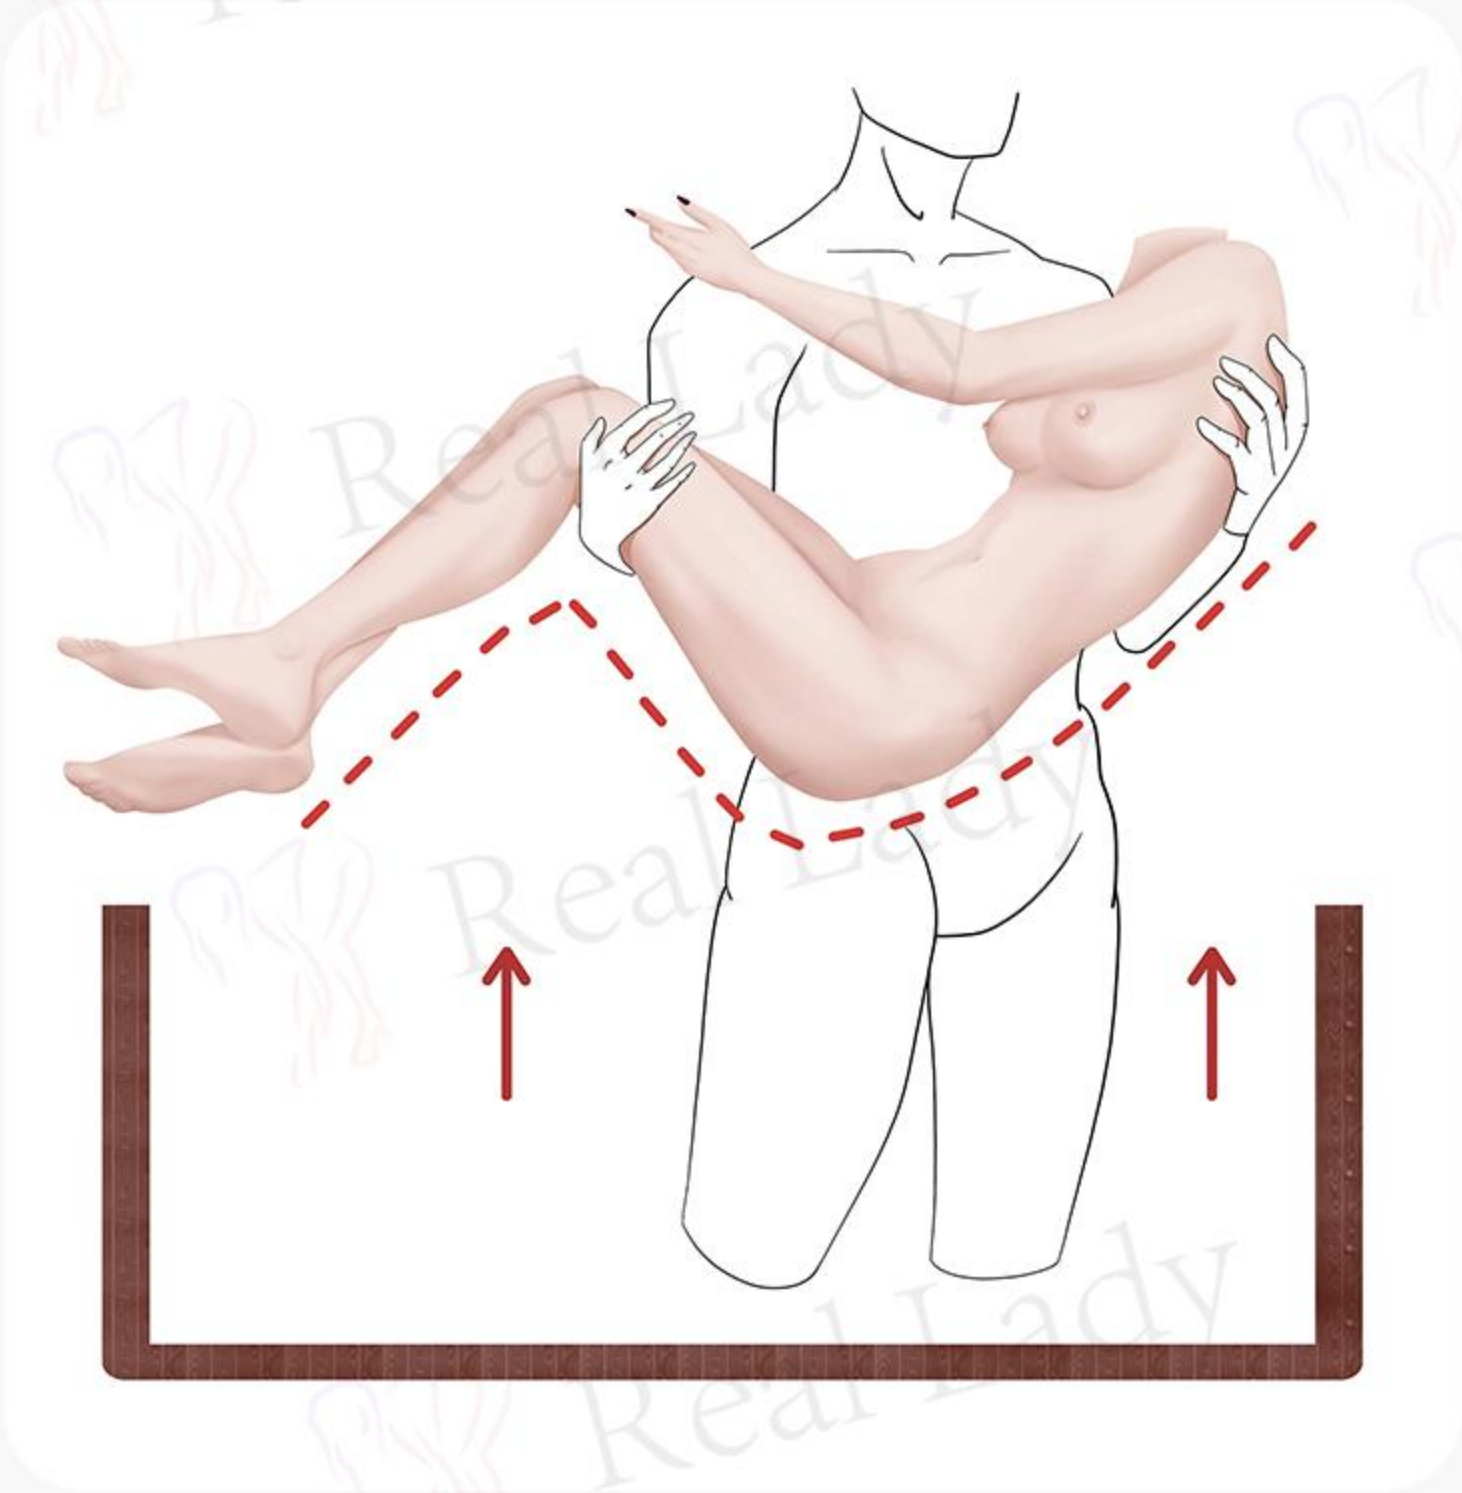

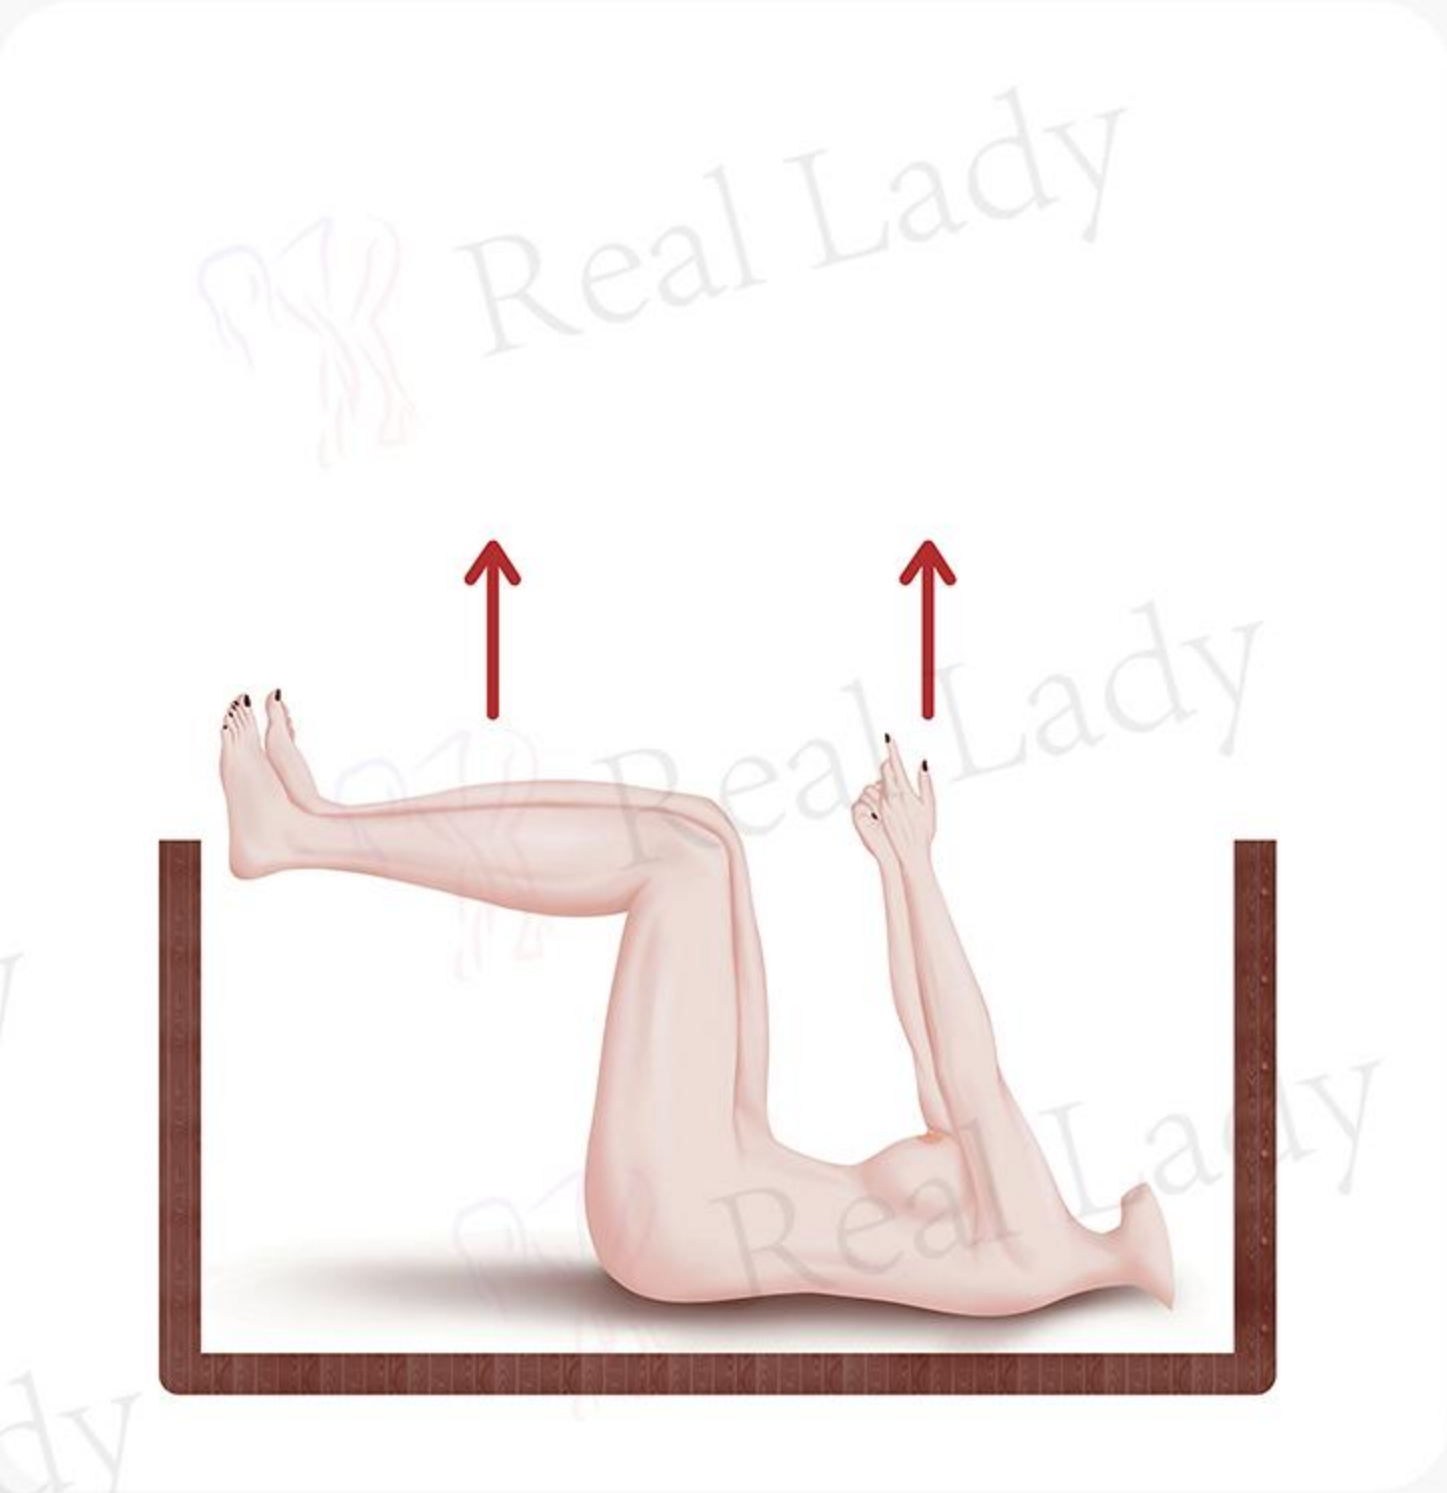

Lingerie

We provide sexy lingerie, adding charm and authenticity to every playtime scenario.

How to safely remove the doll from packaging

- Remove the protective foam and accompanying accessories from the packaging.
- Position the doll to match the reference image provided.
- Lift the doll out using a bridal lift, with your arms passing around its back and behind its knees for gentle and secure support as shown in drawing.

How to use my robot sex doll?

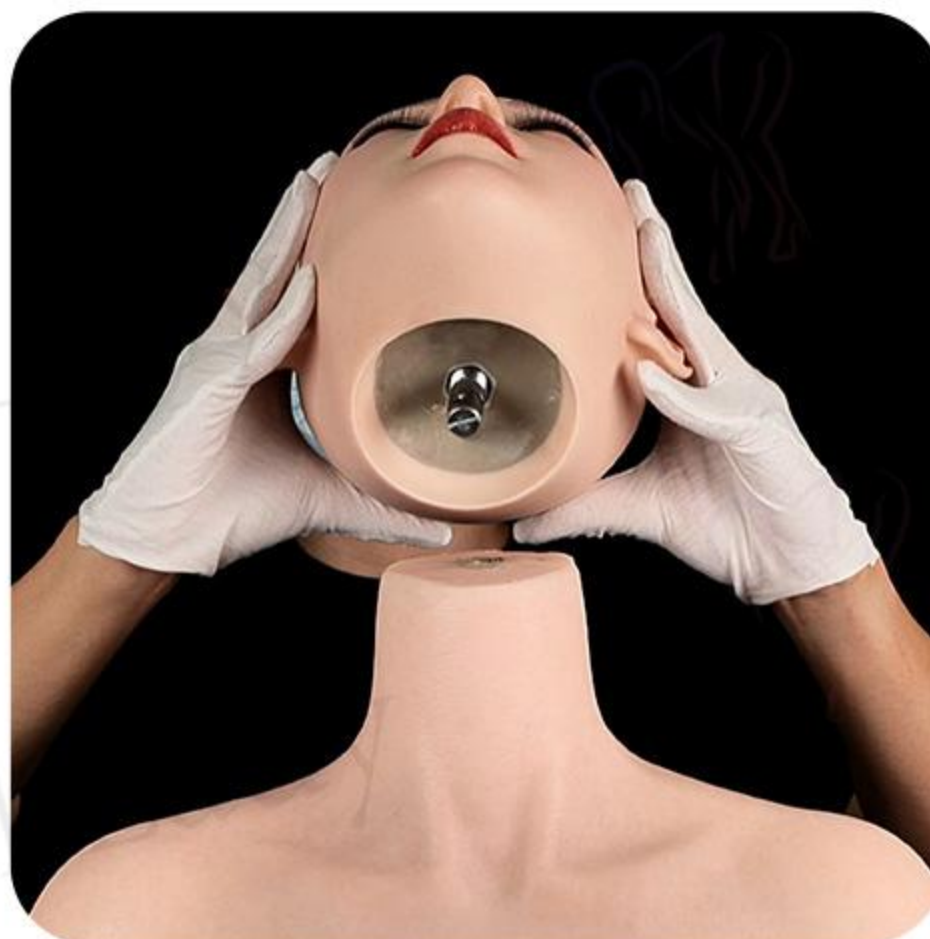

If you've purchased a Real Lady with robotic customization features, please refer to the Irontech Doll website for more information, including instructional videos. We will consistently update the robot function instructions on this page.

HOW TO ATTACH

How to attach the head

Quick connector

Inserts directly without any rotation.

Sway-pivot connector

Sway-pivot connector enables a natural and flexible head movement dimension. Each Sway-pivot connector is adjusted to ensure optimal tightness before shipping.

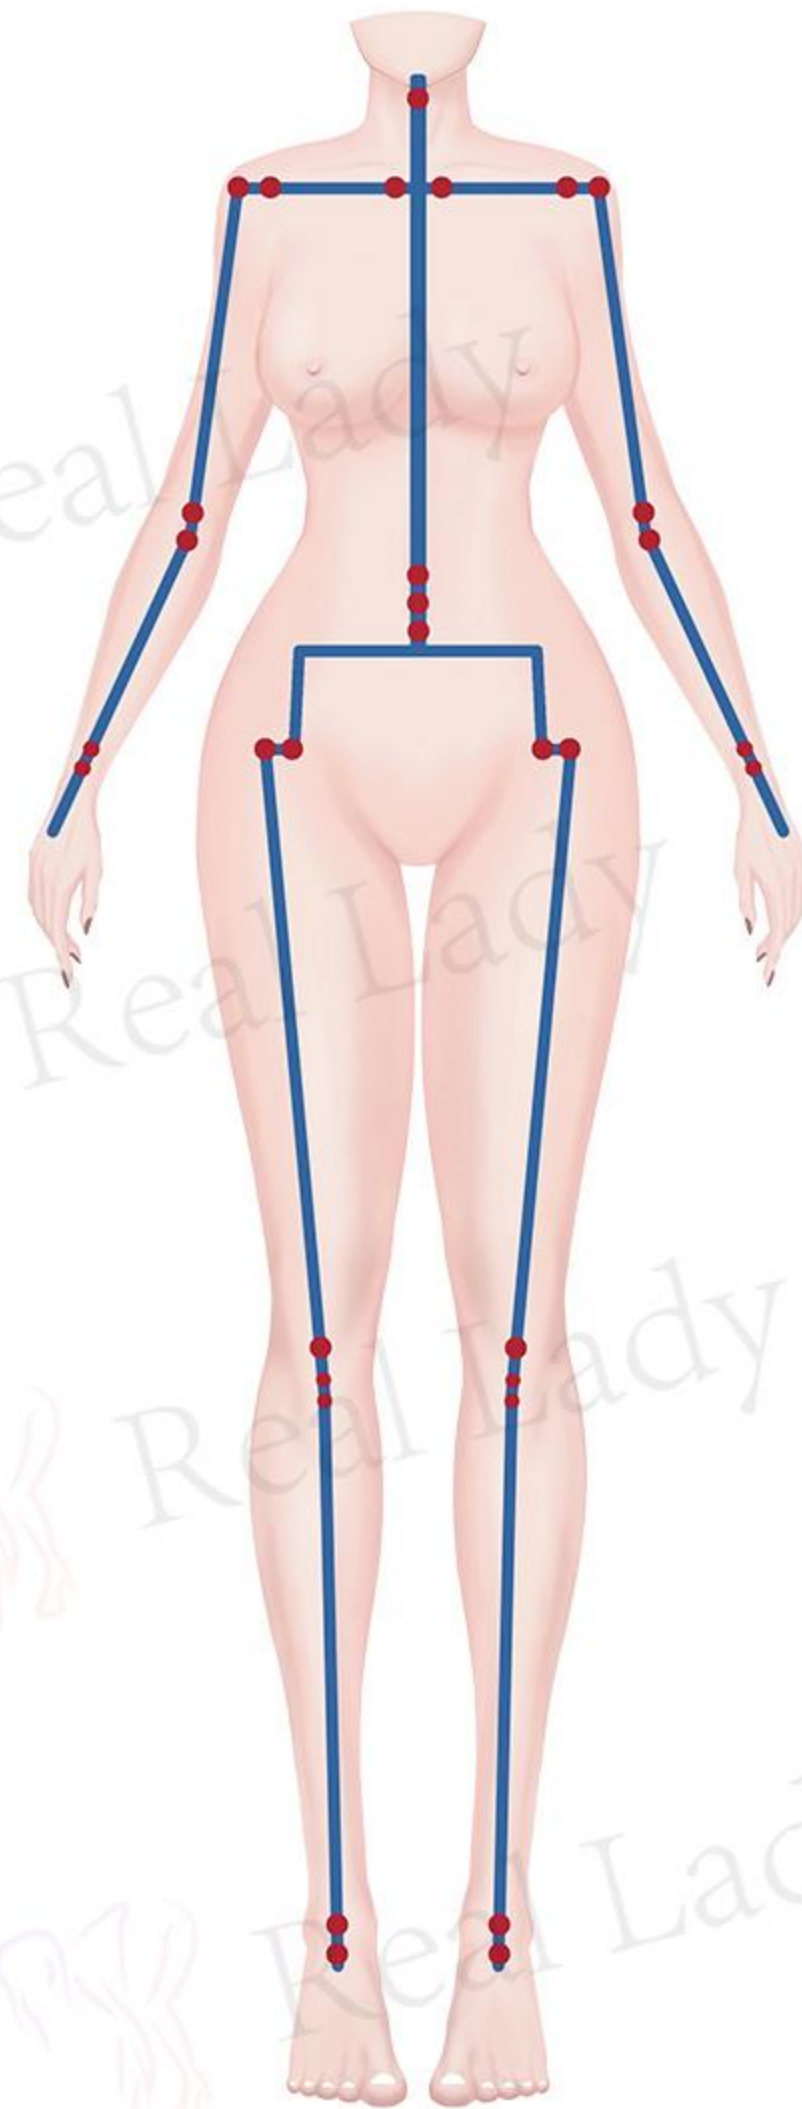

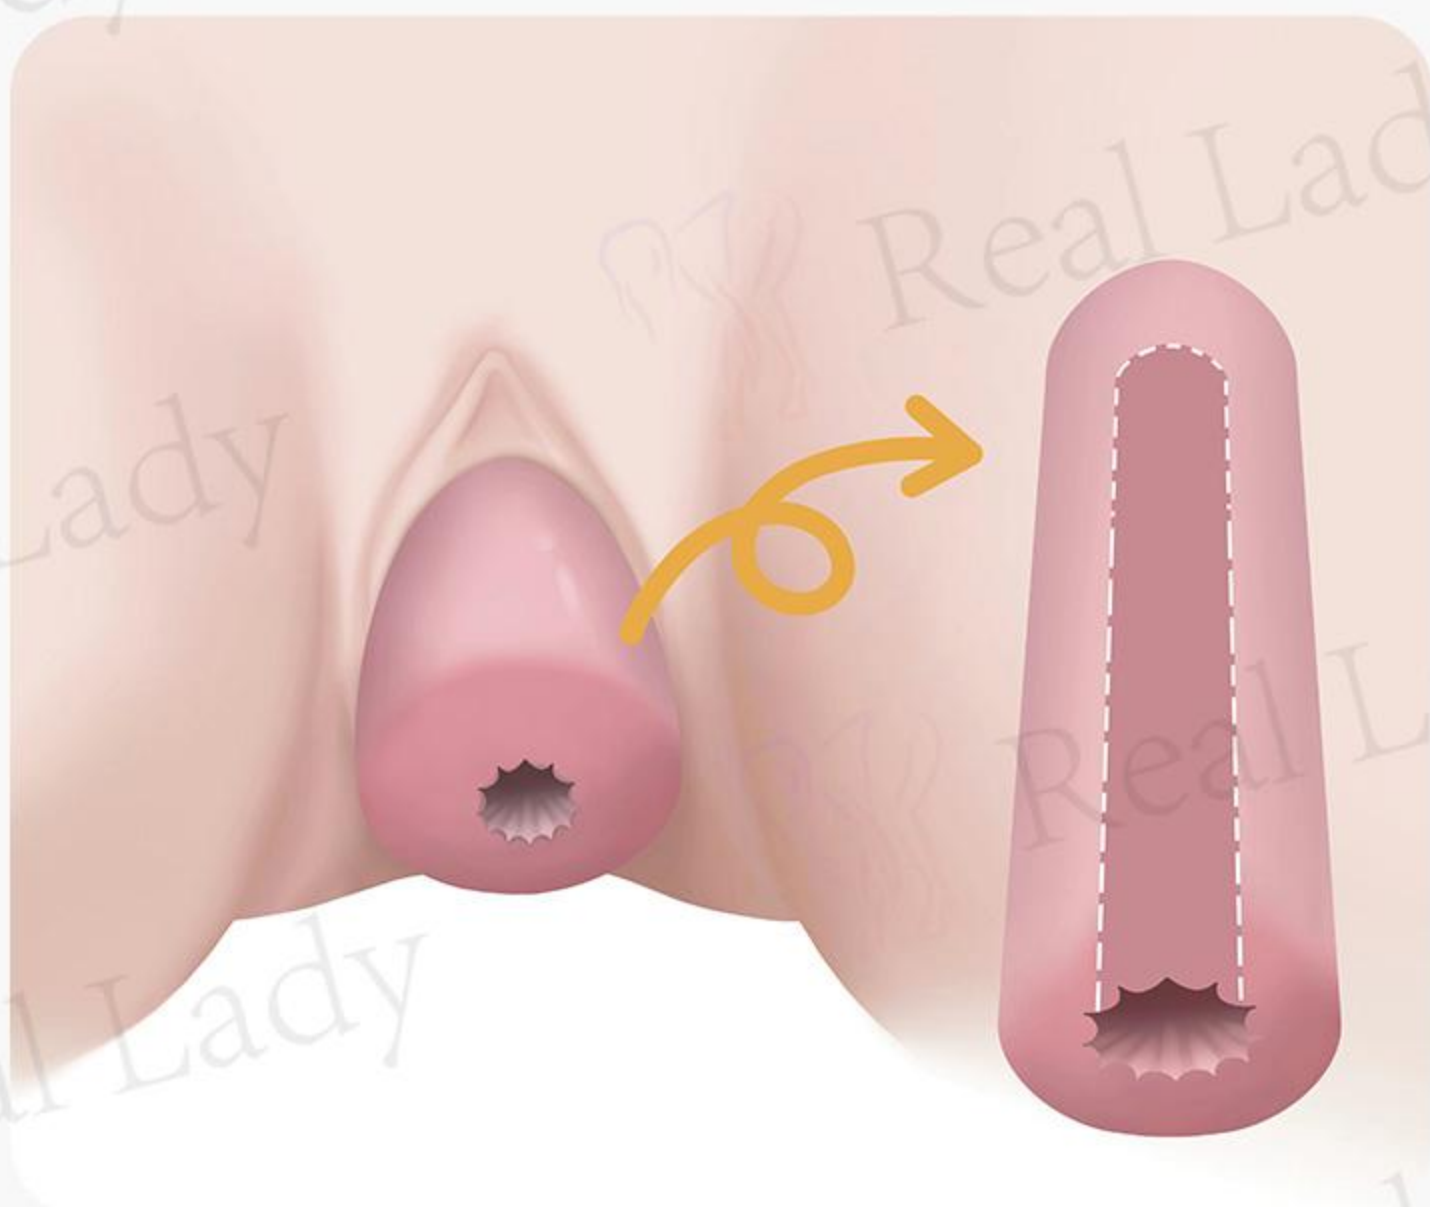

How to insert a removable vagina

A removable vagina is easy to clean. If you choose a removable vagina, please follow the steps below to insert it.

- Coat the exterior of the removable sleeve with a water-based lubricant (water based only).
- Gently insert the removable sleeve into the vagina. Do not use a sharp or pointy object as it could damage the material.

Body movement

The Real Lady metal skeleton has more than 30 joints, enabling multiple, flexible poses for the doll. Please follow the instructions and do not rotate the joints excessively.

How to correctly operate the doll

When manipulating the doll, use one hand to stabilize the body while using the other to move the joints.

Protect the knee and elbows with a soft pad. Use pillows or soft supports to maintain a natural body shape when storing or displaying the doll.

Neck

The neck can bend forward and backward, and to the left and right.

Shoulder

Real Lady has a joint for shrugging the shoulder, allowing more upper-body positions.

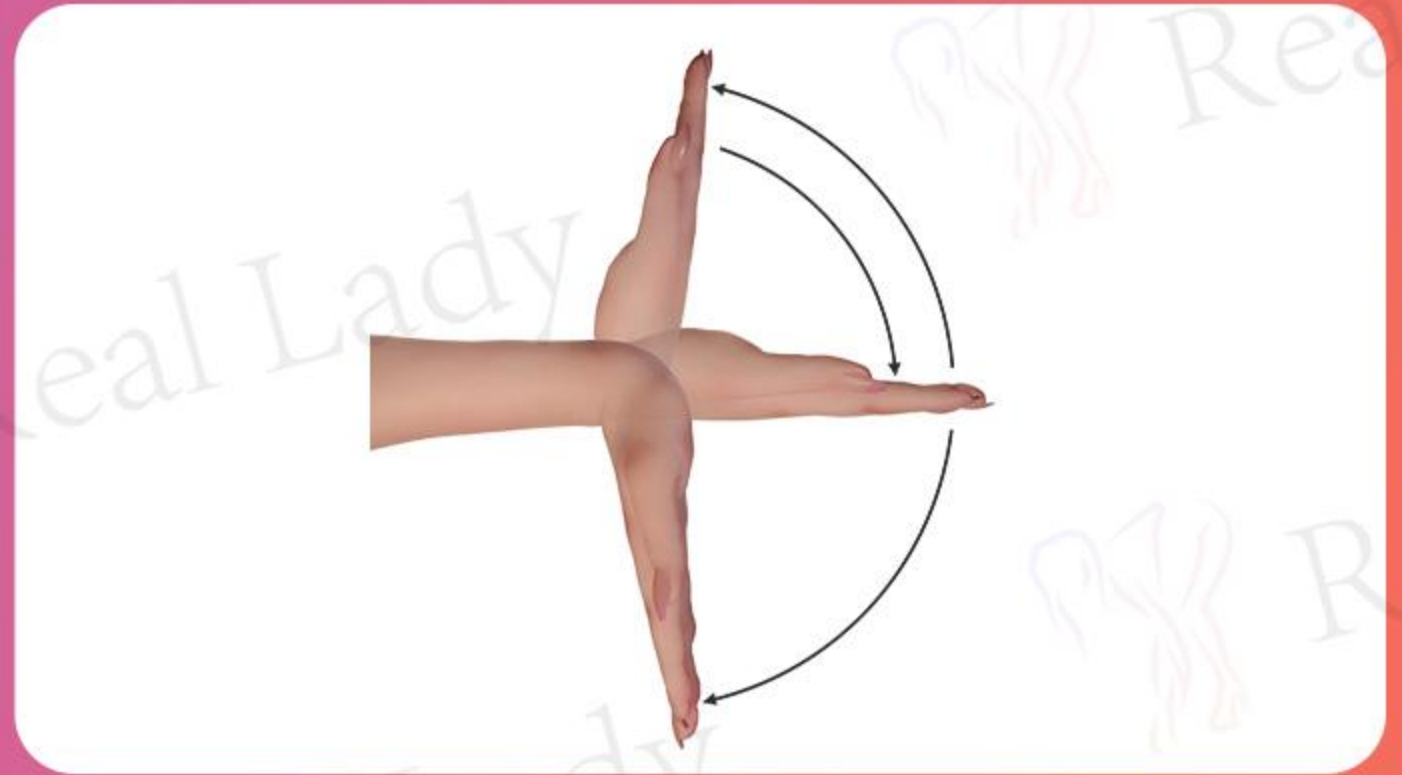

Arm

Flexion, extension, internal rotation, external rotation, and circumduction are available for arms.

Wrist

Flexion, extension, abduction, adduction, supination, and pronation are available for the wrist.

Waist

Waist can bend forward, backward, sideward, and rotation.

Leg

The leg can bend forward, backward, sideward, medial rotation, lateral rotation, and split.

REAL

Ankle

Plantar flexion and dorsi-flexion.

How to clean a sex doll

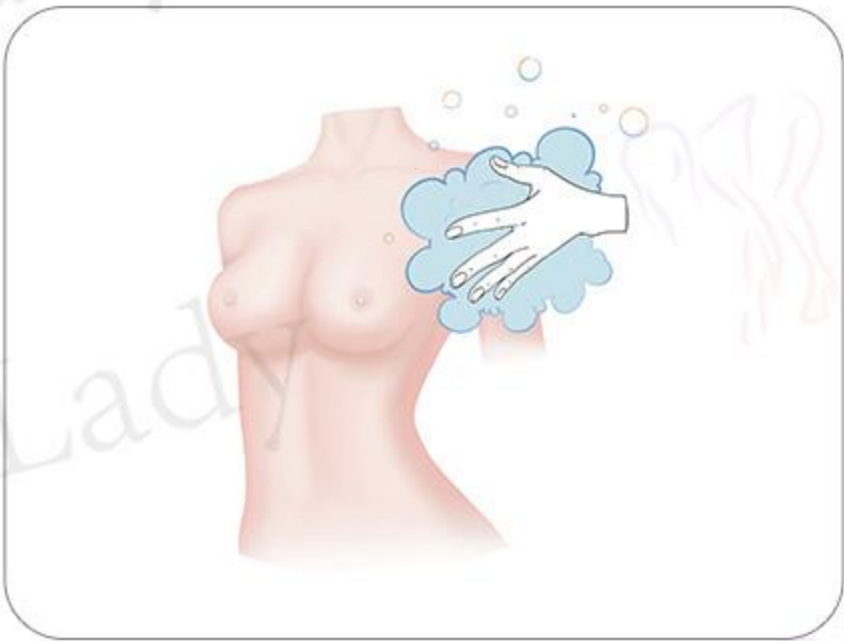

01

Mix appropriate shower gel with water to create foam.

02

Cleanse the body, avoiding excessive force that may damage the skin.

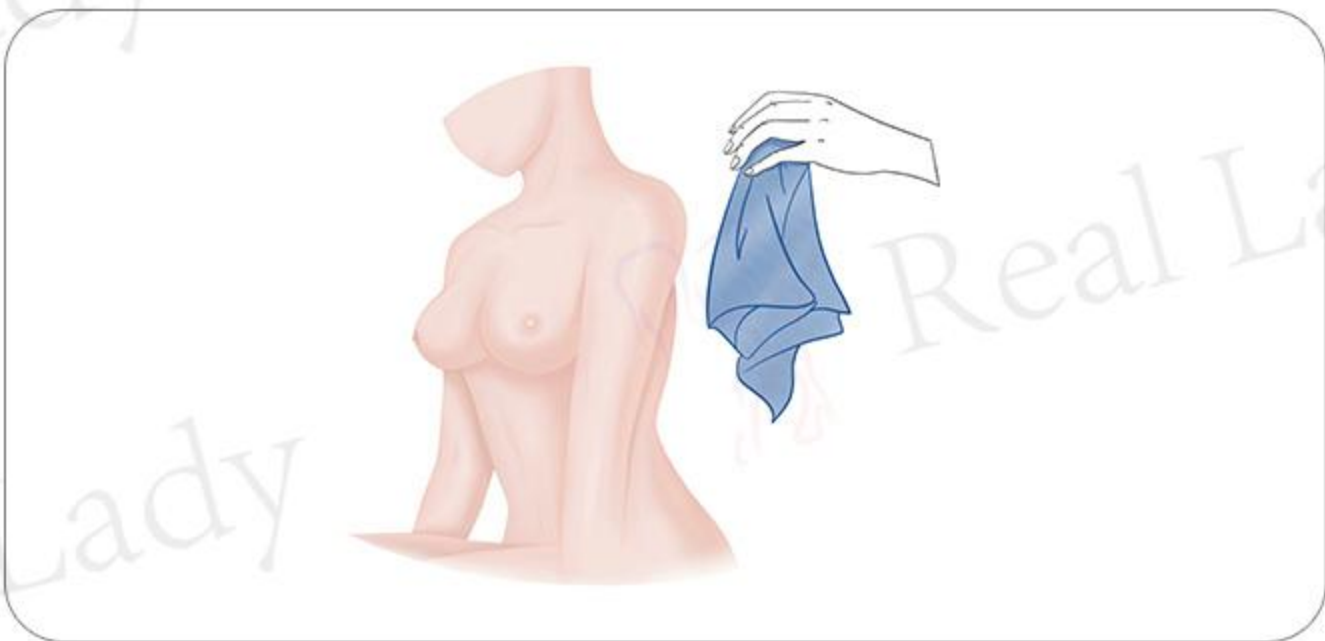

03

Rinse the body to remove all shower and bath foam.

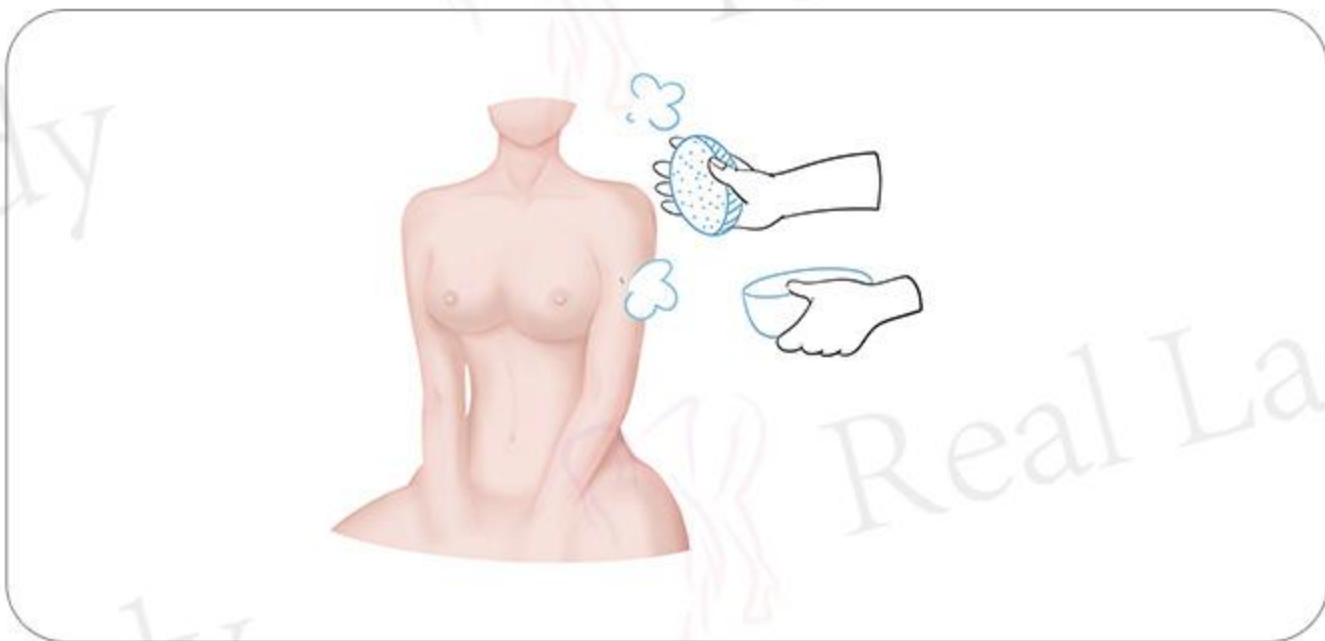

04

Gently pat the body dry with a clean towel to remove any remaining moisture.

05

It's best to apply body powder to keep the skin dry.

How to wash a synthetic wig

Materials: shampoo, towel, wide-tooth comb

Steps

01 Brush the entire wig to prevent the hair from tangling.

02 Turn the wig inside out so the side with the wig cap faces outward.

03 Pour the shampoo into the basin, then stir it to create a foam.

04 Clean the wig gently with your hands. Avoid vigorous rubbing.

05 Rinse away the foam with water.

06

Gently press and dry the wig using a towel.

07

Turn the wig outward. Once the wig is fully dry, comb it through with a comb.

Warning

Avoid:

Keep the doll away from sharp objects, oils, solvents, and silicone-based lubricants, as these can damage the doll's skin. Use water-based lubricants ONLY.

Staining:

Dark-colored clothing may cause skin staining. Please wash the dark clothes before dressing the doll. In case of accidental staining, clean the affected area with soapy water until the color fades. Use a stain removal cream to eliminate the discoloration marks for severe stains.

Body painting:

The realistic body painting may fade gradually over time due to friction and cleaning. Regarding the **ultra-soft silicone body**: It doesn't hold color as well as regular silicone. With friction and exposure to silicone natural oils, the body paint might slowly fade over time.

When changing your doll's clothes, please do so gently. We suggest using smooth fabrics (for the clothes, a lightweight blanket, and cushion cover) to reduce the risk of the paint fading caused by friction during use.

Preservation:

It is advisable to have dolls wear light colored bras that are light weight (preferably white, wireless bras or shapewear or sport bras) to prevent staining and to help maintain the doll's natural breast shape.

Image Discrepancy:

The advertising pictures were taken by professional photographers and there may be slight differences between the actual product and the images in the advertisement. We do not use Photoshop enhancements on our dolls - only professional photographers and make-up artists are employed.

High Temperature and High Altitude Environment:

The doll's skin may swell if you are located in an area with high temperatures or at high altitudes. Please gently use a needle to puncture the skin to release the trapped air. Repeat this process several times until the swelling subsides.
